# W. B. CLARKE & SON

SAN JOSE, CALIFORNIA

December 1, 1930

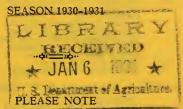

# **LIST 3020**

COVERING STOCK OFFERED BY

# CLARKE NURSERY CO.

SAN JOSE, CALIF.

All summer quotations not accepted to date are hereby cancelled.

Terms. To buyers of known or established credit, 60 days from date of invoice. Otherwise cash with order or 25% with order, balance C. O. D.

Grading. Plants that are wider than they are tall are graded by width.

Quantities. Five or more plants of one kind and size will be supplied at 10 rate; 50 or more at 100 rate; 500 or more at 1000 rate.

Pots. Prices on pot grown stock do not include the pots and unless otherwise instructed plants will be removed from pots before shipping. If wanted in the pots they will be charged for at cost, but can be returned if desired and credit will be given.

Packing. Will be charged for at cost as usual, including paper pots if used. Plants will be packed to secure lowest possible freight classification consistent with the nature of goods shipped. All prices are at our nursery unless otherwise stated.

Shipping. Our responsibility ceases when goods are delivered to transportation company in good order. They travel at buyer's risk. Please state distinctly whether you wish goods shipped by freight or express and where water shipment is possible be sure to specify by water or rail as you may prefer.

Nomenclature. Plant names, both botanical and common, have been revised to conform with 1923 edition of "Standardized Plant Names," with the addition of a few common names widely used on the Pacific Coast.

This list covers items of which we now have a fairly good supply unsold. Many other things can be furnished in moderate quantities and quotations will be made on request. So if you want any ornamental stock not listed here write us about it.

This list is for the trade only and all prices are strictly net. Landscape Architects and Landscape Gardeners who are not actual nurserymen will be charged 20% in addition to the rates quoted herein.

Both firms are members of

CALIFORNIA ASSOCIATION OF NURSERYMEN

# Novelties and Scarce Items

Special attention is called to the following interesting lines. Sizes, prices and descriptions are given in the corresponding divisions of this list.

# **Lining Out Stock**

We offer many items in small sizes for growing on. They are not listed separately but will be found at the end of each item if any stock is available for that purpose.

# Abbreviations

It is important for buyers to know whether they are getting seedlings or cuttings, etc., so for every item we have shown how propagated using the following abbreviations:

C—cuttings G—grafted

S—seedlings B—budded

# CONIFERS

Unless otherwise stated all plants in this section will be balled at prices quoted.

NOTE—A large proportion of our conifers are grafted on seedling roots which gives them a far better root system than when grown from cuttings. 100 10 each

# To Eastern Nurserymen

Please look carefully through enclosed price list. Our eastern business is steadily increasing. Many items are so readily grown in California that it is cheaper to get them from here than to raise or buy them elsewhere.

California may seem a long way off, but freight is not serious on deciduous stock. Furthermore, while we cannot promise to do so in all cases, we are very often able to combine different orders and give to all the benefit of carload rate which is identically the same TO ANY POINT EAST OF THE ROCKIES. Heated refrigerator cars can go any time during winter to practically any eastern point. Also we can make l. c. l. shipments to any Atlantic Coast point via New Orleans and Steamer which has proved very satisfactory.

We particularly call your attention to the following:

FLOWERING FRUIT TREES in general
COTONEASTERS
BIRCH, Cutleaf Weeping and Young's Weeping
HAWTHORNS (Crataegus)
MAPLE, Schwedler's
MULBERRY, Weeping
SYCAMORE, European (Oriental Plane)
LILACS
also note list of Novelties and Specialties on page 2.

JAPANESE CHERRIES, erect and weeping

We can always supply Boxwood, Phoenix (Date Palm) and Kentia Palms in carload lots. If interested write for current prices.

We solicit inquiries for anything in the nursery line produced on the Pacific Coast.

## FLOWERING CHERRIES

We have specialized on these beautiful trees for years and have the largest commercial collection in the U. S. A. All propagation is direct from our own specimen trees. They are correctly and authentically named. Below are descriptions of varieties still available for this season. Any further information will gladly be given on request.

#### ERECT GROWING VARIETIES

- AMANOGAWA. Light pink, semi-double. Growth remarkably slender and upright requiring little space.
- ANEMONE. Pink, semi-double. Flowers formed like Anemone or Hepatica. Bears a tremendous crop of flowers.
- ASAHI. Pale pink, very double, 35 to 40 petals. Flowers borne on long stems. Somewhat similar to Victory but new leaves are green, not bronze.
- AMPANULATA. The only truly red cherry. Flowers single, bell shaped Three weeks earlier than any other variety. Growth extremely vigorous.
- DAYBREAK. An unidentified variety. Extremely early. Flowers single pink borne entirely before the leaves and in such profusion as to make the tree look like a cloud of pink. The most effective variety in our collection. Growth strong
- GOSHOZAKURA. Clear pink. Double. As Japanese name indicates, the flowers are almost always in clusters of five. Very pretty. Grows rather
- OIKO. A very odd sort. Flowers are double and white variegated green or at times green variegated white. Occasionally flowers show pink GYOIKO.
- HIZAKURA. An excellent pink, deeper at edges and back of petals. Double, about 15 petals. Mid-season or slightly later. Good bloomer.
- JUGATSUZAKURA (P. subhirtella autumnalis). Name means October cherry. This occasionally blooms in the Fall but usually in the very early Spring. Flowers are single, long narrow petals, light pink with cerise at the tips and on the back. Flowers nearly one inch in diameter. Very beautiful. Has the longest blooming period of all.
- KANZAN (Sekiyama). A very beautiful double pink variety with extremely large flowers. Much like Naden but has fewer and larger petals.
- KURAMAYAMA. A beautiful double flowered variety opening out rather flat. The center is flesh pink but marked with carmine at the edges. The petals are ruffled or frilled. Late.
- MIYAKO. Flowers double and large nearly two inches in diameter, almost white, faintly flushed. The center of the flower usually has several carpels which are green, or white veined green, giving it a unique appearance.
- MOMIJIGARI. A subhirtella variety, so has small flowers which are red in the bud but open deep pink. Semi-double, about 15 petals. Very pleasing.
- NADEN. One of the loveliest and most double of the pink flowered varieties. The petals are so numerous as to make the flower a perfect tuft showing no center. This is not the Naden of Wilson.
- SHIROTAE (Mt. Fuji). The best double white. Flowers are large and double. Foliage light green. A good grower. Also known as Mt. Fuji and Komatsunagi-zakura.
- SHOGETSU. Double, pale pink. Very free bloomer.
- TAIZANFUKUN. Flowers of medium size, double and tufted. Light pink becoming flesh or nearly white. Leaves small. The tree grows unusually erect and slender.
- TAKASAGO. This is the cherry that Wilson calls Prunus sieboldi. Flowers are double, light pink on rather short stems and massed into large compact clusters. Blooms early before the leaves appear. Very showy.
- single and semi-double. Buds flesh TAKINIOI. Flowers of medium size, single and semi-dopen flowers white. Valued for its delightful fragrance
- UKON. Unique in having yellow flowers, somewhat greenish. When the, flowers get old the center and the veins of the petals change to cerise. A good grower. Late.
- VICTORY. Also known as Shirofugen. Flowers extremely large, up to 2½ inches diameter, borne in racemes of about three on a long stem. Very double, 35 to 40 petals. Coloring very unique. Flowers open a pale pink become white and then turn cerise. For this reason trees will always show white and pink flowers at the same time.
- YAMAZAKURA No. 67963. A good double pink.

#### WEEPING VARIETIES

These have a charm of their own. All are top worked on erect stems.

DOUBLE PINK WEEPING. One of the scarcest varieties in our collection. Branches droop but not as strongly as the single weepers. Flowers are of medium size and double, 50 to 60 petals. Color deep pink. Has to be top grafted to make a good tree.

EUREKA WEEPING (P. subhirtella pendula; Japanese Weeping Rose Flowering Cherry). This is the common, single flowered, light pink Weeping Japanese Cherry that has been grown in this country at least sixty years which is a tribute to its beauty and popularity.

PARK WEEPING (P. aequinoctialis pendula rosea). Introduced by us a few years ago. Somewhat like Eureka Weeping but differs in its more vigorous growth, type of foliage and most important the color of the flowers which are deep pink instead of light pink. Branches droop strongly but do not grow as directly downward as do those of Eureka Weeping.

SHIDAREYOSHINO. A weeping type of P. yedoensis. Very vigorous and decidedly weeping. Flowers larger than preceding sorts and pure white. Very scarce.

We have and propagate a good many additional varieties of Erect Growing Japanese Cherries but above list covers everything still available for this season.

# Lilacs

Named Varieties All our Lilacs are pinched when a few inches high so all sizes are branched and practically all will bloom the first season.

NOVELIES		
each	10	100
rate	rate	rate
4 to 6 ft. B	1.50	
3 to 4 ft. B	1.25	
2 to 3 ft. B	1.00	
1½ to 2 ft. B	.75	
1 to 1½ ft. B	.60	
In order to show what sizes are available		
for each variety we use letters following		
each name. The code is as follows:		
A for 8 to 10 ft. E for 2 to 3 ft.		
B for 6 to 8 ft. F for 1½ to 2 ft.		
C for 4 to 6 ft. G for 1 to 1 1/2 ft.		

Capt. Baltet—Single. Violet lilac. E-F-G.

Jan Van Tol—Single white. Both the clusters and the individual flowers are of enormous size. A very good grower and free bloomer. Very fine.

E-F-G.

Maurice Barres—Single. Mauve opening lilac blue. E.

Mme. Francisque Morel—Double. Light creamy lilac. Very fine. E-F-G.

Mrs. Edward Harding—Double. "Bright carmine rose. Bears big panicles of large full flowers. Awarded the special prize founded by Mrs. Edw. Harding for the best double red lilac." This is the introducer's description. Has not flowered with us as yet. E-F-G.

Pres. Faillieres—Double. Lavender pink. Color charming. Trusses simply enormous. Flowers large and very double. Truly magnificent and easily the best. E-F-G.

Pres. Poincare—Double. Claret mauve. Clusters of unusual size, very compact, with very large flowers. One of the best. C-D-E-F.

Reaumur—Single. Violet carmine. Buds deep purple. Clusters rather long, single or forked. Very good. E-F.

DOUBLE VARIETIES

\*Berryer—Mauve. Petals curly. Free bloomer. E-F.
Chas. Sargent—Violet mauve blended sky blue; enormous flowers and clusters. E-F-G.
\*Claude Bernard—Bright mauve. Included in the "Early Lilacs" but really in a class by itself and distinct from all others. Petals are long and wavy or twisted. Largest flowers are an inch broad. Very fine.

Condorcet—Almost pure blue. Semi-double. F-G.
Edith Cavell—Milk white. Buds tinted deep cream. Handsome. E-F-G.
Edouard Andre—Rose or nearly pink. F-G.
Ellen Willmott—Snow white. Elegant spikes; fine large flowers of the
"hose in hose" type. G.
Emile Gentile—Bright cobalt-blue. B.
Georges Bellair—Carmine becoming purple. Very profuse and compact. G.
Hippelyte Megica.

pact. G.
Hippolyte Maringer—Purplish mauve; compact clusters. D-E-F.
Jean Bart—Carmine becoming rosy purple. Petals sharp and twisted.
Unique. E.
Jean Mace—Mauve changing to bluish purple. Very good. B-F.
Jeanne d'Arc—White. Flowers very large: Very early, profuse and fine
in every way. E-F-G.
La Tour d'Auvergne—Dark lilac. Good. F-G.
Leon Gambetta—Pink-lilac. Early. Among the best. C-D-E-F-G.
Marechal Lannes—Mauve becoming pinkish blue. Beautiful color.
E-F-G.

#### DOUBLE VARIETIES (Continued)

Maximowicz—Violet heliotrope. Clusters long and well filled, F-G, Montaigne—Pinkish mauve. Very large clusters. C-D-E. President Loubet—Deep purple becoming reddish lilac. D-E. President Viger—Purple becoming lilac. Clusters large and dense. E-F, \*Vauban—Pale mauve pink. Panicles large. Delicious fragrance. Extremely free bloomer. Strong grower. A-B-C-D-E. Victor Lemoine—Pinkish purple becoming mauve blue. Clusters much forked. Strong fragrance. D-E. Waldeck-Rousseau—Double. Deep violet flowers, borne in long trusses. E-F.

SINGLE VARIETIES

\*Buffon—Flowers large, pink shaded mauve. B-E-F-G.
Christopher Columbus—Opens clear blue. Late. E-F-G.
De Miribel—Dark bluish violet. Very late. D-E-F-G.
\*Descartes—Mauve blue. Exceedingly free blooming. Flowers before leaves appear. B-C-D-E-F-G.
Diderot—Deep purple; buds almost black. Clusters very long and narrow. G.
Dr. Breitschneider—Pure pink. Blooms on new wood, hence late. E-F-G.
Dr. Lindley—Brilliant violet-purple, buds red. Fine regular clusters. E-F-G.

E-F-G.

Glorie de Lorraine—Dark purple. Flowers very large. E-F-G.

Glorie de Lorraine—Dark lilac becoming blue. E-F.

Hugo Koster—Reddish purple. Clusters of good size and regular form.

E-F-G.

E-F-G.

\*Lamartine—Mauve pink. Clusters much forked. Flowers large. Extremely vigorous and one of the earliest. A-B-E-F-G.

\*Louvois—Purple becoming blue. Clusters extra large. D-E-F-G.
Ludwig Spaeth—Dark purple. Clusters long and slender. Late. D-E-F.
Lutece—Pink. Very late. Blooms on new wood. C-D-E-F.
Marie Le Graye—White. Early. An old favorite. D-E-F-G.

\*Mirabeau—Mauve. The earliest of all. Extremely vigorous. B-C-E-F.
Mont Blanc—White. Large flowers and clusters. Very fragrant. D-E-F-G.
Perle von Stuttgart—Pure white. Both flowers and clusters very large.

C-D-E-F-G.

Vestale-White. Flowers large. Our earliest white variety. Very fine. D-E-F-G.

\*Varieties starred are the new "Early Lilacs." These are hybirds between Syringa giraldi and the earliest varieties of S. vulgaris. They are very distinct from previous varieties in both appearance and habit. They are ten days to two weeks earlier and the clusters are borne well above the foliage at the ends of long erect branches. Leaves are only partially developed when they bloom. These features give them very great value as cut flowers. We recommend them highly.

venusta, SILKY WISTERIA	rate	rate	rate
Bears a profuse crop of large white flowers			
in short compact clusters. Very precocious, often blooms one year from graft.			
4 year G	. 2.25	1.75	
Mrs. McCullagh			
A scarce and very beautiful variety. Short jointed and of rather slow growth. Flowers			
large in compact clusters of medium size. Color rich mauve purple.			
3 year G	2.25	1.75	
2 year G.	2.00	1.50	
OTANDADD WYOTEDAA			
STANDARD WISTERIAS	•		
Offered this season for the first time. They are about the size of a good Standard Rose			
but with 4 ft. stems. Heads sufficiently de-			
veloped to make a good showing. As they are quite a novelty we believe they will sell			
well.			
Assorted varieties G	2.50	2.00

WISTERIA (Continued)

We can supply collected roots for shipment from Santa Cruz Mountains direct to customers at \$7.50 per 100. No shipment of less than 50.

# Roses

## BUSH AND STANDARD

We grow both bush and standards extensively and specialize on the best of recent sorts. As this list goes to press we are digging and de not want to issue new list until that job is completed and we know just what is unsold.

Revised list corrected down to date will be issued in early December. If you are interested write us for a copy. For descriptions of all varieties offered see our List No. 3014 which will be sent on request.

SEE NEXT PAGE FOR SUPPLIES

# **Supplies**

MOSS—We offer only Oregon Tree Moss in bales of about 50 lbs. These bales are made up entirely of selected sheets suitable for florists' use, lining hanging baskets, etc. It is bone dry so you are not buying water. Very different from the general run offered. Prices f.o.b. San Jose:

1 bale \$5.00 5 bales at 4.50 10 bales at 4.25

PAPER POTS—We are agents for Bird & Son's famous Neponset Red Paper Pots, the same kind we use in our own packing and shipping. Prices quoted are for the pots at factory in Mass. They can be shipped economically to any Pacific Coast point via Panama Canal. All orders must be for not less than a case of any size.

Size	Quantity	Weight	Price
	per case	per case	per 1000
2 ½ in.	1000	12 lbs.	\$ 3.40
2 ½ in.	1000	16 lbs.	3.90
3 in.	1000	24 lbs.	5.30
3 ½ in.	1000	34 lbs.	6.90
4 in.	500	23 lbs.	8.60
5 in.	500	37 lbs.	13.40
